Projects

Smart Appointment & Queue Management System 2026
ReactJS, Django REST Framework, Python, PostgreSQL

Live Demo

GitHub

- Built a full-stack appointment and queue management system with secure authentication and role-based access.
- Implemented real-time queue tracking with automatic wait-time updates and unique token generation.
- Deployed the frontend on Vercel and backend on Render with GitHub-based CI/CD.

AI Placement Assistant

GitHub

Python, Streamlit, ChromaDB, Groq API, Sentence Transformers, BM25, RRF

- Built an AI-powered placement assistant using Retrieval-Augmented Generation (RAG) with hybrid retrieval (Dense + BM25 + Reciprocal Rank Fusion) and cross-encoder reranking.
- Implemented agentic query routing, conversation memory, and multi-step company comparison using Groq LLaMA 3.3 70B.
- Developed voice input/output, resume eligibility analysis using PyMuPDF and LLM-based parsing, and an evaluation framework for faithfulness, correctness, and relevancy.
